

TOP FIVE REASONS TO ADD OEM approved transceivers from AMC to your networks

- 1 OEM transceivers are much too expensive!
- 2 OEMs like Cisco and Juniper often have VERY long lead times
- 3 Increased warranties over the OEMs (Cisco = 90 days, AMC Optics = Lifetime!)
- 4 100% OEM Compatible – Equal Performance with much lower costs
- 5 Stretch your IT budget further by adding AMC compatible transceivers in with the OEM original!

Fiber Optic Transceivers
 Network Memory Upgrades
 Fiber Optic Cables
 Media Converters
 DWDM & CWDM MUX/DEMUX

Small form factor, pluggable

KEY BENEFITS:

- 100% Full Lifetime Warranty
- Free Advanced Replacement and Engineering Support
- Extremely cost effective products with equal performance
- Massive inventory with immediate availability
- Stretch your IT budget further than ever before!

OVERVIEW:

- Does not void smartnet/warranty
- 100% OEM Compatible
- Hot pluggable
- Short to 100+ km distances
- 100Base, 1000Base, 10GBase, 40GBase, 100Gbase products in stock!

FAQ:

- What is the difference between AMC Optics product and OEM or other third party manufacturers?**
 Absolutely nothing, the only difference is price, packaging, and service.
- Are AMC Optics components compatible with all OEM's?**
 Yes, AMC Optics components are tested in our on-site lab to guarantee 100% compatibility with any OEM.
- Does AMC Optics offer third party solutions for other than Cisco and HP Procurve?**
 Yes, AMC Optics offers a 100% compatible third party option for any OEM from Adtran to Zyxel.
- What is the warranty on AMC Optics third party receivers and memory?**
 All AMC Optics OEM Approved transceivers and memory come with a LIFETIME WARRANTY!
- Will the use of AMC Optics third party components void my OEM warranty like Smartnet?**
 No, an OEM cannot void warranty for the use of third party components.

 To see Cisco's official Third Party Policy simply search "Cisco third party policy" or go to:
